Omar Rashad Hassan

AI Data Specialist | LLM Evaluator | Data Science Student

Cairo, Egypt | +201030185098 | orashad661@gmail.com | github.com/fightinamigo | linkedin.com/in/omar-rashad-457630358

Summary

Data Science student at Cairo University with hands-on experience in AI/LLM evaluation, data annotation, and bilingual Arabic-English language tasks. Experienced in assessing AI-generated content for accuracy, safety, and coherence using structured evaluation guidelines. Strong foundation in programming, data structures, and object-oriented design, with growing expertise in Python data analysis, sports analytics, and data-driven workflows. Native Egyptian Arabic speaker with professional English fluency (C1).

Education

Cairo University, Cairo, Egypt 2024 — 2028

Bachelor of Science in Data Science — Faculty of Computers and Artificial Intelligence

Experience

Outlier AI, Remote Jan 2024 — Present

AI/LLM Evaluator (Contractor)

- Evaluated 100+ LLM-generated responses weekly for accuracy, coherence, helpfulness, and safety
- Applied structured rating guidelines across diverse prompt categories including code, reasoning, and creative tasks
- Maintained consistent quality scores and adherence to strict evaluation standards
- Provided detailed feedback contributing to model improvement across the Aether project

Emaar Marassi Resort, Egypt Jul 2026

Operations Administrator (One-Month Role)

- Supervised ushers and tracked daily attendance for about 86 ushers across locations
- Cross-checked rosters against attendance lists to report absences accurately
- Wrote incident and maintenance reports and cleaned gate access logs by removing duplicate entries

Skills & Languages

- **Programming:** Python (pandas, matplotlib, mplsoccer), C++, SQL
- **Tools:** Git, GitHub, CLion, CMake, Jupyter, Google Colab, Excel, Power BI, Label Studio
- **AI/Data:** LLM Evaluation, Data Annotation, Prompt Analysis, Quality Rating, Data Visualization, Sports Analytics (StatsBomb)
- **Arabic:** Native (Egyptian dialect)
- **English:** Professional Fluency — C1

Certifications

- **Object-Oriented Programming Specialization** (5 courses) — University of London & Goldsmiths, Coursera
- **Microsoft Power BI Desktop for Business Intelligence** — Maven Analytics (Udemy, 17 hours)
- **Data Structures & Algorithms** — Udemy

Technical Projects

2018 Champions League Final Analysis · Python, pandas, mplsoccer | github.com/fightinamigo/ucl-final-2018-match-analysis

- Analyzed Real Madrid 3-1 Liverpool with StatsBomb open data: **shot and xG summary, xG shot map, player pass map**
- Wrote a short conclusion from the data explaining why Madrid won despite equal shot counts

Sports Car Market Dashboard · Excel | github.com/fightinamigo/sportcar-data-analysis

- Built an interactive dashboard on a Kaggle dataset of **1,007 sports car models (2019–2023)** for a dealership manager

Beauty & Wellness Network Database · SQL | github.com/fightinamigo/beauty-wellness-db

- Co-designed a relational database for a luxury spa network in a **team of 6**, including the physical data model and SQL implementation

Elmenus Food Delivery System · C++ | github.com/fightinamigo/cpp-elmenus-clone

- Built a full food delivery management system with 14-option menu, customer/driver registration, order lifecycle tracking, and file-based reporting
- Demonstrates advanced OOP: **inheritance, polymorphism, operator overloading, templates, dynamic memory, file I/O**

MerkelRex — Crypto Exchange Platform · C++ | github.com/fightinamigo/Merkelrex

- Built a fully functional cryptocurrency exchange with real historical CSV trading data (University of London / Coursera)
- Features: **order book management, bid/ask matching engine, wallet tracking**, and market statistics across time steps

C++ Data Structures Library · C++ | github.com/fightinamigo/cpp-data-structure

- Implemented 10+ data structures from scratch: SLL/DLL, Stack, Queue, BST, Graph, Hash Table (chaining)
- Full sorting suite: **Bubble, Selection, Insertion, Merge, Quick, Shell** + Floyd's cycle detection, palindrome checker, kth-from-end

TCP/UDP Socket Programming · C++, Winsock2 | github.com/fightinamigo/cpp-socket-programming

- Built UDP DNS resolver and TCP password-cracking simulator using Windows Winsock2 API
- Demonstrates client-server architecture, port management, and dictionary + brute-force attack simulation

Smart Waste Management System · C++ | github.com/fightinamigo/Smart-Waste-Management-System

- Co-developed an IoT-inspired system with sensor integration, complaint management, and route optimization
- Multi-role architecture: Citizen, Driver, Supervisor, Technician — each with distinct responsibilities
